

## **GEALUX 4000**

<b>Chemical Nature:</b>	emulsion of special waxes
<b>Active Substance:</b>	approx. 17%
<b>pH:</b>	approx. 8,0
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	grey liquid
<b>Utilization:</b>	pull-up effect on leather

### **PROPERTIES**

---

GEALUX 4000 has been developed from paraffin-based waxes in order to achieve a strong pull-up effect with enhanced darkening on vegetable tanned leather and good effect on chrome leather. GEALUX 4000 may be applied to both full grain and buffed leather. Application may be carried out in roller coating machines or with spray-gun. After drying, the leather may be subjected to hot plate and polishing for the complete fusion of the wax. GEALUX 4000 may be combined with GEOFAT FINISH 1449A to increase the darkening and the pull-up effects even further.
