

## **GEAGROUND MA 99**

<b>Chemical Nature:</b>	combination of proteins and polyurethanes
<b>Solids Content:</b>	approx. 15%
<b>pH:</b>	approx. 9,0
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	translucent liquid
<b>Utilization:</b>	top coat for protein finishes

### **PROPERTIES**

---

GEAGROUND MA 99 is a compound developed for natural finishes that require transparency and natural look. Its balanced composition enables a large use on protein finishes. Used as only product, it is recommended to add just water in the proportion of 1:1 with Water and GEADERM S Color liquid dyes to match colors.

In order to achieve a glossy finishing with natural look, it is recommended to ironing or “carteggiare” at 120°C after its application.
