

GEAGROUND NUBUCK

Chemical Nature:	balanced combination of binders and auxiliary agents
pH:	approx. 8,5
Ionic Charge:	anionic
Film Hardness:	very soft
Film Transparency:	clear
Aspect:	opalescent liquid
Utilization:	correction of colours on leathers such as nobuck with pigment application

PROPERTIES

GEAGROUND NUBUCK is a balanced compound of especially selected extremely fine particle binders with synthetic and natural waxes providing a pleasant surface feel after application of the solution. GEAGROUND NUBUCK is especially recommended for pigmented corrections of nobuck-like leather. This product is usually diluted in water and pigment in a ratio of 1:1 up to 80 g/l. In order to achieve the best writing effect, always apply sponge after each application.
