

GEAGROUND CRACK

Chemical Nature:	Combination of very hard, natural and synthetic binders
Active Substance:	approx. 13%
pH:	approx. 9,0
Ionic Charge:	anionic
Aspect:	white liquid
Utilization:	Very hard finish for crackled effect.

PROPERTIES

GEAGROUND CRACK is a combination of extremely hard natural and synthetic binders for finish films with crackled aspect after a softening and expanding mechanical operation. Due to the shine and hardness it imparts, GEAGROUND CRACK may also be used in small quantities in top coats. This product is recommended in finishes that require a shiny, more vitreous aspect.
