

## **GEOFAT FINISH 1460**

<b>Chemical Nature:</b>	self-emulsify synthetic oil
<b>Active Substance:</b>	approx. 97%
<b>Ionic Charge:</b>	not ionic
<b>Aspect:</b>	yellowish chestnuts liquid
<b>Utilization:</b>	pull-up effect

### **PROPERTIES**

---

GEOFAT FINISH 1460 is a self-emulsify synthetic oil used in pull-up type finishes. Applied pure or diluted in water, provides pull-up effect with a slightly greasy touch. The effect is directly related to the applied load. GEOFAT FINISH 1460 can also be applied on the flesh side to improve the uniformity of oils and waxes absorption that eventually are applied on the grain. To increase the darkening effect is recommended to combine GEOFAT FINISH 1460 with GEALUX 2000 in the desired proportion. Its application can be on thermodot machine, or with spray gun. After the application, the ideal is to let the leathers rest for at least 6 hours before completing the effect with smooth plate or felt polishing.
