

GEAGROUND CRN

Chemical Nature:	balanced composition of binders and auxiliary agents
pH:	approx. 7,0
Ionic Charge:	anionic
Aspect:	opalescent liquid
Utilization:	color correction for nubuck type leathers

PROPERTIES

GEAGROUND CRN is a balanced composition of specially selected binders with extremely fine particles, with natural and synthetic waxes suitable for maintaining a pleasant feel to the surface after application. GEAGROUND CRN is especially indicated for pigmented correction of nubuck type leather.
