| 5. GEACOR MF ORANGE | 12. GEACOR BLUE |
| 6. GEACOR ORANGE | 13. GEACOR S BLACK |
| 7. GEACOR RED | 14. GEACOR BLACK |

PROPERTIES

The GEACOR series pigments were especially developed to work with anionic finishes, providing excellent covering power and optimal leveling. Other important characteristics are the natural look that the product grants to the finishes, and the color intensity. In the series GEACOR there is still the definition GEACOR MF for yellow and orange colors, which are versions of heavy metals free, to comply with the markets that require this property.

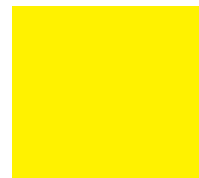

The adjacent colors are a graphical representation of the color and may present a variation between the card and product.
