### **PROPERTIES**

---

GEAGROUND BASE SNT is a natural pre-bottom. Whenever applied on roller coating machine in the proportion of 800 g GEAGROUND BASE SNT to 200 g anionic pigment, it provides the leathers medium closing and leveling. As principal virtue, it does not evidence the neck wrinkles and stretch marks fattening. GEAGROUND BASE SNT maintains the natural look of the leathers with good definition of the pores. It is recommended after applying the pre-bottom to emboss the leathers (pore or relax) and, afterwards, according to the characteristics of the article, mill or not the leathers. Indicated for Nappas and natural finishes of low coverage.
