

## COMPOUND CMN

<b>Chemical Nature:</b>	combination of acrylic binders, polyurethane resins and auxiliary products
<b>Active Substance:</b>	approx. 18%
<b>pH:</b>	approx. 7,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	white liquid
<b>Utilization:</b>	coverage base for natural finishes

### PROPERTIES

---

COMPOUND CMN is a coverage compact compound formulated for finishes that require transparency and natural appearance. Its balanced composition allows for wide application on articles that require a high level of physical and mechanical resistances. When used as an only product it is recommended to add just water in a 1:1 ratio. Metal-complex dyes and pigments may be added. GEAGROUND CMN is mainly recommended for articles used in leathersgoods as well as rustic and natural-looking furniture upholstery. On top coats, it is advised to use GEAGROUND CMN in combination with products in the GEAPUR, GEATOP and GEABIND ranges.
