pH (10%):	approx. 7,5
Ionic Charge:	anionic
Aspect:	light chestnut powder
Light Fastness:	medium
Utilization:	retanning agent for filling, equalization the dyeing and buffing

PROPERTIES

GEATAN MX is a retanning agent that gives good grain firmness and filling to the leather. It improves the grain aptitude to scouring besides helping to equalize the dyeing. GEATAN MX can be used together with other retanning agents in the same float. Its use is recommended for different articles, such as: box, nubuck, semi-chrome, suede and nappas in general.
