

## **GEALUX 2000**

<b>Chemical Nature:</b>	special waxes-based emulsion
<b>Active Substance:</b>	approx. 30%
<b>pH:</b>	approx. 9,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	yellowish-white liquid
<b>Utilization:</b>	pull up effect leathers

### **PROPERTIES**

---

GEALUX 2000 is a product developed based on paraffin waxes in order to obtain strong pull up effects with darkening, on vegetable tanned leathers, as well as on chrome tanned ones. GEALUX 2000 can be applied on full grain, and on buffed leathers. The application can be made on thermo-dot machines or with spray gun, and after drying the leathers can be submitted to heat or polishing, for the total fusion of the wax. Whenever GEALUX 2000 is combined with GEOFAT FINISH 1449A, it presents a considerable increased darkening, and pull up effect.
