

## **GEAFEEL TDG**

<b>Chemical Nature:</b>	silicone in aqueous emulsion
<b>Active Substance:</b>	approx. 40%
<b>pH:</b>	approx. 5,0
<b>Ionic Charge:</b>	no ionic
<b>Aspect:</b>	dull white liquid
<b>Utilization:</b>	hand feeling

### **PROPERTIES**

---

GEAFEEL TDG is a hand feeling agent developed with special raw materials that provide silky, and sliding surface touch. Due to its particular characteristics, GEAFEEL TDG provides significant improvement in the results for wet and dry friction tests. GEAFEEL TDG is compatible with all types of top coats. It is also used in bottom coats, where it can be auxiliary for covering and for reducing surface tack. In this case, we recommend use at the most 10g/kg of the product to avoid adhesion problems.
