

GEATAN FLN LÍQ

Chemical Nature:	phenolic based syntan
Active Substance:	approx. 40%
pH (10%):	approx. 4,0
Ionic Charge:	anionic
Aspect:	yellowish liquid
Light Fastness:	excellent
Utilization:	General use retanning agent, particularly recommended for the obtainment of white leathers

PROPERTIES

GEATAN FLN LÍQ is a phenolic syntan recommended for all types of leathers, particularly for white and light colored leathers. It presents optimal whitening power, excellent light fastness and ageing resistance. Provides closed pores leathers and uniform dyeing. Gives the leathers a firm grain and average filling, which can be incremented with other retanning agents of the GEATAN line, such as GEATAN RD 44, GEATAN S70, GEOTAN PB 54, GEOTAN PA 50, and GEOTAN P 150. GEATAN FLN LÍQ is compatible with other vegetable and synthetic tannins.
