

GEATOR LV

Chemical Nature:	combination of organic solvents and non-ionic surfactants
pH:	approx. 6,0
Ionic Charge:	anionic
Aspect:	transparent liquid
Utilization:	coverage coats and top coats

PROPERTIES

GEATOR LV is a leveling agent that helps the spreading of aqueous finishing without interfering on the leather's wet physical resistances. GEATOR LV is used on any type of water base bottom or top coats, improving the spread, foam formation and making the application easier. Its usage is recommended between 1% and 3% of the solution, as its use in excess could damage the curtain machine applications.
