

## COMPOUND NRB

<b>Chemical Nature:</b>	compound of acrylic polymers modified with special additives
<b>Active Substance:</b>	approx. 25%
<b>pH:</b>	approx. 8,5
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	white opalescent viscous liquid
<b>Film Hardness:</b>	soft
<b>Film Transparency:</b>	transparent
<b>Utilization:</b>	patent articles

### PROPERTIES

---

COMPOUND NRB is a composition of acrylic linking agents, with hand feeling agents, special waxes and auxiliaries. COMPOUND NRB provides very natural and transparent finishes, with pleasant and silky hand feeling. It can be used as only product, just adding pigment and water according to the desired article.
