

GEAGROUND LB

Chemical Nature:	waxes, natural oils emulsion in water basis and linking agents
Solids Content:	approx. 7,5%
pH:	approx. 8,5
Ionic Charge:	anionic
Aspect:	yellowish liquid
Utilization:	finishes requiring equalization, polishing resistance and provide intense gloss

PROPERTIES

GEAGROUND LB is a specially made product for light finishes that require optimal equalization, high polishing resistance, and which provide intense and natural gloss. GEAGROUND LB, for being extremely heat reactive, provides a burnish type polishing, even containing pigment in its combination. It is advised to use 350 to 400 parts of product, with up to 50 parts of pigment and the balance of water for obtaining the described effect.

For higher resistances is recommended to add acrylic linkage agents or polyurethanes that do not interfere on the polishing characteristics and the product reactivity, such as GEORESIN FG 55 or GEAPUR F-40.
