

GEAGROUND AN

Chemical Nature:	combination of linking agents and auxiliary products
Solid Content:	approx. 8,5%
pH:	approx. 10,0
Ionic Charge:	anionic
Aspect:	white viscous liquid
Utilization:	soft pre-bottom for upgrade

PROPERTIES

GEAGROUND AN is a pre-bottom used for grain reconstruction and upgrading. Its usage also helps reducing the pores size and improves the absorption of the next finish layers. GEAGROUND AN is indicated to improve “grain off” problems, because it seals the surface allowing to get a smooth, transparent, leveled and pleasant finishing. Due to its composition, GEAGROUND AN can be used for tumbled leathers and for polishing or ironing.
