

## **GEALUX LT**

<b>Chemical Nature:</b>	synthetic wax in aqueous solution
<b>Active Substance:</b>	approx. 30%
<b>pH:</b>	approx. 9,0
<b>Ionic Charge:</b>	anionic
<b>Aspect:</b>	yellowish liquid
<b>Utilization:</b>	polished finishes that require gloss and natural look

### **PROPERTIES**

---

GEALUX LT is a wax emulsion especially developed for application on polished leathers, where the natural look and gloss are relevant. It grants optimal reactivity and very natural gloss to the leather when submitted to heat or friction. It can be used in combination with other waxes of the GEALUX line from a choice related to the desired characteristics.
